

HALF-DAY WORKSHOP & TOUR

Home Renewable Energy

Learn from someone who has navigated the learning curve from suburban life to independent off-grid country living!

- **TOUR A MODERN OFF-GRID HOME •**
- **LEARN RENEWABLE ENERGY BASICS •**
- **GET UP-CLOSE WITH THE HARDWARE •**
- **CONSERVATION TIPS & TRICKS •**

Thinking of going off-grid yourself, or just want to know how it all works? This 3 hour blend of seminar, discussion and practical experience is an engaging primer on home-scale energy generation. Topics include:

- Off-grid living: what's similar, what's different from on-grid life
- Assessing needs: estimating power consumption, sizing a system
- Energy generation: renewable (solar & wind) and backup (fueled generators)
- Storage: battery types, charging cycles
- DC-to-AC conversion: inverter types, technologies, and capacities
- Conservation: specialized appliances, lighting, battery-powered yard tools

Plus: get an up-close look at solar panels, 1kw wind turbine, and power components.

Workshop-Tour is scheduled on-demand, for you or your group, subject to availability.

Bookings/info: 519-794-0129 or see web site

Located 20 min southwest of Owen Sound, near Keady.

\$95 * FOR 1-2 PEOPLE + \$15 per additional person, up to 8 total. Includes "solar snacks" 😊

In 2009, Neil sold his conventional suburban house (and conventional suburban life!) in the GTA in favour of off-grid living on 50 woodland acres... and never looked back.

*subject to change
